CAREER SUMMARY

Cloud and infrastructure engineer with 6+ years architecting and operating mission-critical enterprise systems on cloud platforms. More recently, I have focused on applied Generative AI, building MCP servers, RAG pipelines, and agentic workflows that integrate with existing systems. I combine a strong foundation in production-grade cloud operations with hands-on AI development. I prioritize security and reliability, designing solutions that fit safely into existing systems and meet enterprise security standards.

PROFESSIONAL EXPERIENCE

Nomura Research Institute, Ltd. — Tokyo, Japan

Applied AI Engineer | April 2025 – Present

- **MCP System Integration** : Drove MCP server adoption across financial systems and led rollout to 2 securities firms, integrating customer data with LLMs to embed AI into core data and eliminating manual data-control workflows.
- **AI Workflow Implementation**: Built an AI agentic workflow for incident response that ingests historical incident data and server logs to automate first-response triage, cutting troubleshooting time by 40%.

Senior Infrastructure Engineer | April 2020 – Present

- **Cloud Migration & Architecture** : Delivered ¥50M+ in annual cost reduction by leading an end-to-end OCI migration of 100+ production Linux and Oracle DB servers. As cloud architect and migration lead, managed a team of 10+ engineers over an 18-month program, owning migration planning, execution, and architecture design.
- **Security Improvement** : Achieved 100% compliance with international security standards for mission-critical financial systems by implementing 30+ cybersecurity controls within regulatory audit deadlines, cutting operational risk.

Accel Universe, Inc. — Tokyo, Japan

Data Scientist Intern | May 2019 – March 2020

- **Applied ML** : Built object-detection/CNN models for manufacturing image-recognition by preparing and annotating training datasets, then researching, evaluating, and tuning models through iterative validation.

EDUCATION

Yokohama National University — Kanagawa, Japan

- M.E., Engineering, Electrical Engineering, Computer Science | March 2020
- B.E., Engineering, Electrical Engineering, Computer Science | March 2018

CERTIFICATIONS & SKILLS

Certifications

- Google Cloud Certified – Professional Machine Learning Engineer | Apr 2025
- Google Cloud Certified – Professional Cloud Architect | Dec 2024
- Japan Statistical Society Certificate Level 2 | Aug 2023
- Database Specialist Examination | Dec 2022

Skills

- **Language**: English — Limited Working Proficiency (TOEIC 800) | Jan 2026
- **Frontend & Backend** : Python, Node.js, TypeScript, Bash, REST APIs, Oracle, Vector DB
- **AI & ML** : LangChain, RAG, MCP, Agentic Workflows, Prompt Engineering, Parameter tuning, Vertex AI, AWS Bedrock
- **Cloud** : Google Cloud Platform, AWS, Oracle Cloud
- **Developer Tools** : Antigravity, Visual Studio, Xcode, JIRA

Others

- Participated in 3 hackathons, including the Agentic AI Hackathon with Google Cloud.
